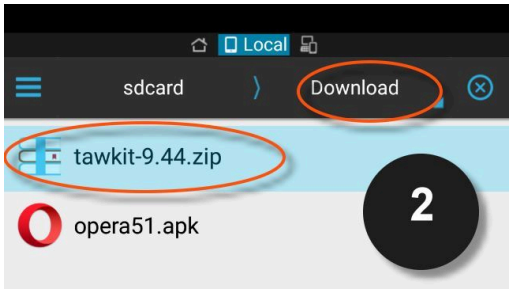
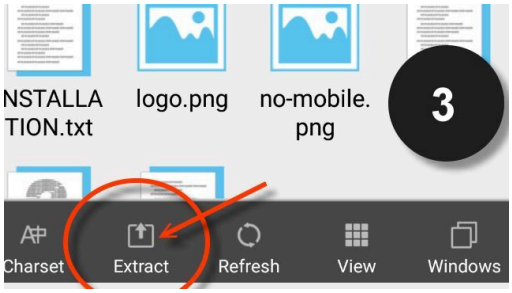
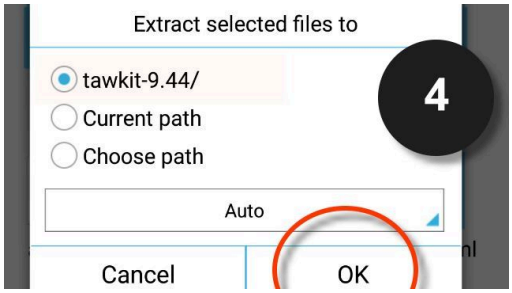
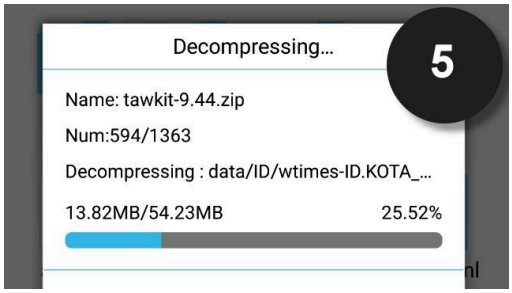
TAWKIT.NET

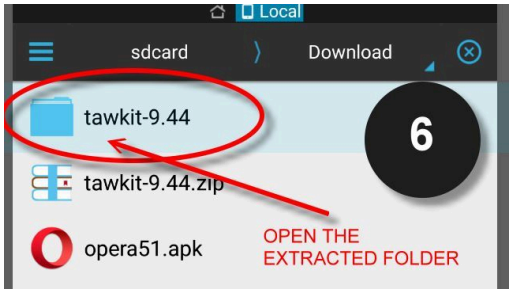
Tawkit Installation for Android 5 to 9

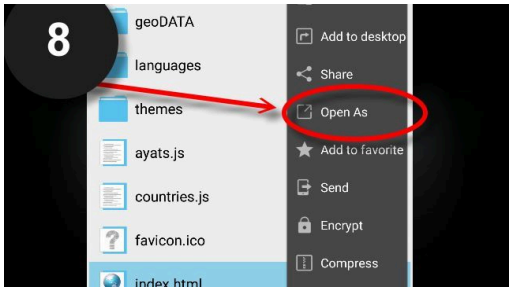


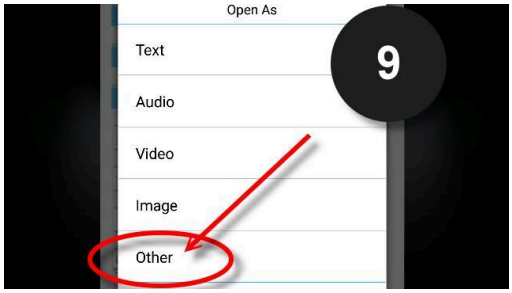


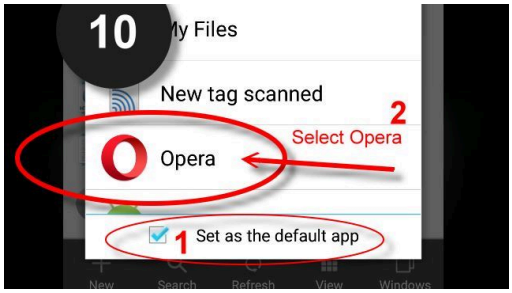












STEP BY STEP INSTALLATION

- ☐ You need Android Media-Box with android version 9 or less !
- ☐ Install https://tawkit.net/files/opera51.apk.
- ☐ Install https://tawkit.net/files/ES-Explorer.apk (**IMPORTANT** to use this old version! and don't update it!).
- ☐ Download Tawkit in Downloads folder of your device.
- ☐ Open ES-Explorer and go to Downloads.
- ☐ Open tawkit.zip you downloaded, and click on Extract.
- ☐ Go back, and open the extracted folder of tawkit, and start the file index.html in Opera Browser !

If you have problems with this methode to install tawkit in your device,
you can try the Methode 2

If you couldn't install Tawkit on your Android device,
. enter this adress in your browser : offline.tawkit.net
. or contact an Installer to help you,
. or contact author with more details.
Tawkit.net doesn't sell any media-box. You need to have your own Android Media-Box or any device with a modern Browser. You can also use a Smart TV, but ONLY if its Browser is capable viewing Tawkit application correctly !
To know if a Smart TV is good for Tawkit or no, ask the seller to test this link in its Browser : https://offline.tawkit.net/
If application not showing correctly, then you better use a Media-Box, and contact one of The Installers in your country to help you install Tawkit.
